CORE COMPETENCIES

- Backend Development
- API Design (REST & GraphQL)
- Database Optimization
- Cloud Infrastructure (AWS)
- CI/CD Pipelines
- System Performance Tuning
- Task Queue Management
- Data Structure & Algorithms

EDUCATION

- 2020-2022: M.Tech from Institute of Chemical Technology, Mumbai CGPA: 9.49
- 2016-2020: B.Tech from Mahatma Gandhi Mission's College, Navi Mumbai CGPA: 8.54
- 2014-2016: HSC from NAD Topiwala Junior College Score: 83.4%
- 2014: SSC from St. Ursula High School Score: 92%

TECHNICAL SKILLS

- **Backend:** Django, DRF, FastAPI, Flask, Strawberry GraphQL
- **Databases:** MySQL, MongoDB, SQLAlchemy, Redis
- **DevOps/Cloud:** Docker, AWS (EC2, S3, Lambda), Git, GitHub Actions
- **Frontend:** ReactJS, HTML, CSS, JavaScript
- **Languages:** Python (NumPy, Pandas)
- **Messaging:** Kafka, Celery

ACHIEVEMENTS

- **Meta Back-End Developer Professional:** Linux, SQL, APIs, Cloud Hosting.
- **Coding:** 600+ submissions on LeetCode.
- **Rankings:** AIR 8 in GATB; AIR 552 in GATE BT
- **Awards:** Gold Medal in Science Olympiad (City Level).
- **Leetcode profile :** [LeetCode > SourabhSantosh](#)
- **Medium blog:** [medium blog profile > Sourabh](#)

PROFILE SUMMARY

- Self-taught Software Engineer skilled in building and optimizing RESTful and GraphQL APIs using Django and FastAPI.
- Experienced with MySQL, MongoDB, Celery, Redis and performance-focused backend development.
- Strong foundation in Python, Data Structures & Algorithms (DSA) and Object-Oriented Programming (OOP) principles.
- Proven track record of solving production issues, optimizing system performance and independently owning scalable backend designs serving 20K+ users.

WORK EXPERIENCE

Software Engineer | Goflamingo Logistics Pvt Ltd | Dec '24 - Present

- Addressed 12 + critical performance bottlenecks and production issues across two live products serving 10K+ daily users.
- Independently owned the design and development of a scalable GraphQL backend capable of handling 10k+ req/sec.

Highlights:

- Introduced Kafka-based event processing and Redis caching to optimize performance (40% latency reduction).
- Implemented 2 dockerized services to streamline deployment and scalability.
- Solved stability and communication gaps by implementing critical bug fixes.
- Enhanced backend to improve user experience by faster load times.
- Integrated AWS services and WhatsApp messaging for seamless communication flows.

Backend Developer (Freelancer) | AI Chef Master | Oct '24 – Dec '24

- Diagnosed and resolved database backend issues and communicated with overseas clients.
- Engaged in frontend development team, used ReactJS to ensure cohesive application logic.

System Engineer | Biocon Biologics | Aug '22 - April '24

- Analyzed application and database metrics using Python and SQL.
 - Optimized system performance and ensured data integrity in production environments.
- #### Highlights:
- Driven data-informed improvements based on metric analysis using linear regression models.

Web Developer Intern | Exposys Data Labs | April '22 - May '22

- Developed a social blogging site using Flask.
- Implemented secure user authentication, blog management, and robust backend logic.

PROJECTS

- **RAG-Driven Chat:** Built an intelligent system translating natural-language prompts into optimized SQL queries, eliminating manual SQL writing.
- **GoProDairy:** Solved operational inefficiencies by building a production-grade GraphQL web app with dashboards, dynamic pricing, and automated reporting.
- **Quiz:** Created a DeepSeek-OCR-based platform converting PDFs into interactive, time-bound quizzes with automated extraction.
- **NGO Manager:** Developed a Django-based platform for manual donation tracking and secure receipt delivery.
